

## Task

Prepare procedures for testing SQL server performance.

Prepare tables with about 1,000,000 rows of data.

Prepare procedures that generate random data.

- 1) Check search performance with and without index.
- 2) If you will display inserted data
- 3) Without display inserted data

Data fields:

key field

[date] date type

Name1 varchar(255)

Name2 varchar(40)

Use the timekeeping function.
